**Comments & Conclusions:** Lanes 4, 5 are the test sample Shilajit (SHILP1311XX) Lanes 2, 3, 6, 7 are the reference samples used for comparison. This test sample, Shilajit (SHILP1311XX), is consistent with the chromatographic profile of the reference samples used above. **This test sample Shilajit (SHILP1311XX), has characteristics of vendor supplied reference samples, *Asphaltum sp.* resin.**

**NOTE:** The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
