**Comments & Conclusions:** Lanes 3, 4 are the test sample Lion's Mane (LM-089). Lanes 2, 5, 6, 7, 8 are the reference samples used for comparison. This test sample, Lion's Mane (LM-089), is consistent with the chromatographic profile of the reference samples of Hericium erinaceus used above. **This test sample, Lion's Mane (LM-089) has characteristics of Hericium erinaceus.**

*NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.*
